

## **NEWSLETTER**

**December 2007**

### **MESSAGE FROM** Dr. Mario Soteriou - Director

I would like to take the opportunity to thank you all for your support and patience over the last 6 months. As with all new endeavours we had some technical problems which we have now hopefully solved. We are aware of the frustration associated with our phone system. We all look forward to seeing you in the New Year as we continue our ongoing high level of service.

We appreciate your loyalty and enjoy your company. Cosmetic Image Clinic wishes you all a safe and happy holiday. Have lots of fun.

A very warm welcome from the team to Dr. Nikki Fallon. She is an experienced cosmetic doctor for lines, wrinkles, skin, moles and spider vein treatments.

### **MESSAGE FROM** Dr. Ingrid Tall - Director

Thanks for all your support and have a very merry Christmas and safe new year. Look forward to seeing you in 2008.

Christmas is here!  
We are very close to summer holidays. We have surgeons available for consultations during the summer break.

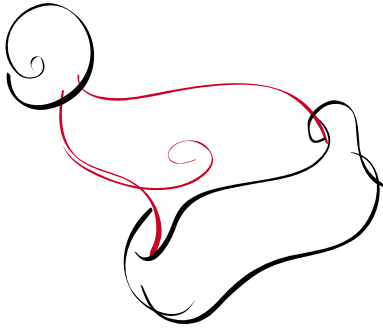

### **WHAT'S NEW**

We have a very new and fantastic product that has just been launched - Restylane Vital. This product has long lasting effects of hydration and complements peel treatments, fillers, and botox injections. This product is excellent for improving the tone and elasticity of the skin and to improve 'crepe' like skin, sun damaged skin and or dehydrated skin.

Just imagine how the décolletage and face will turn out. You need to have 2-3 treatments about 1 month apart, to achieve results.

Along the same line, Qmed have also released a longer lasting product, Restylane Lipp for the body and border of the lip. The product provides roundness and soft fullness of the lip when injected into the vermilion. The look is soft, sensual and natural. It is specifically designed to better withstand the additional stress involved in lip movements. The results are expected to last for more than 12 months, depending upon individual metabolism.

**W**e are also performing a huge number of mole removals with the Surgitron. This procedure is performed by our doctors after the moles are assessed individually. If the Surgitron is suitable we can remove the mole leaving very few marks, if any. It involves a flattening of the mole. Fabulous, as they are basically flattened before our eyes. You can't watch - we show you at the end.

**H**ave you got sweaty armpits, or sweaty hands??

Don't forget to consider treatment for those sweaty armpits and hands. The treatment for hyperhidrosis is proving to be very successful and straight forward. The product lasts about 7 months after it kicks in. Remember the consultation is free.
