

SKIN AND BEAUTY with Dr Ingrid Tall

IT'S PARTY SEASON!

IT'S EASY TO get caught up in shopping for gifts. So easy, in fact, that we often see clients leaving it too late to start their treatments prior to the busy Christmas social season.

It is best to plan your treatments well in advance so that you're looking relaxed, fresh and natural by the time your key event rolls around.

If you want to look amazing in that special outfit for New Year, then CoolSculpting could be your answer. Effects kick in after four to eight weeks, so now is the time to book.

Ideally, injectable and other cosmetic treatments should be undertaken one or two weeks prior to your event. If you happen to find yourself strapped for time closer to the date, we have some amazing treatments that will give you a quick freshen-up. HydraFacial removes any build-up of dead skin cells and infuses the skin with antioxidants, leaving your skin radiant and soft.

Contact the clinic for your invitation to a special free event on 19 November at 5.45pm. There will be great giveaways on the evening, including CoolSculpting treatments valued at \$795!
