NON-SURGICAL FAT REMOVAL

DO YOU HAVE stubborn areas of fat that seem to be immune to diet and exercise? Would you like to have those areas reduced painlessly, without worrying about needles or surgery? Then don't agonise over it any longer: CoolSculpting fat reduction may be the answer.

The CoolSculpting procedure is the only clinically-proven non-surgical body contouring treatment that uses controlled freezing to eliminate fat from your body.

With this walk-in, walk-out procedure, there is no surgery and no downtime. CoolSculpting simply targets specific areas with no damage to surrounding nerves, blood vessels or skin.

CoolSculpting is a non-invasive treatment that can assist in contouring your body by reducing any of those annoying exercise and diet-resistant bulges without surgery.

Book in and join us at 6pm on October 26 for a Cool Event. You'll receive a free consultation and demonstration, as well as access to our exclusive giveaways.
