

## SKIN AND BEAUTY

with Dr Ingrid Tall

## ONE FOR THE BOYS

ONE OF THE benefits of your own platelet-rich plasma is that it's known to rejuvenate parts of the body. Many have turned to the treatment for facials and hair growth and it is now seen as a solution for male enhancement and performance.

Known as the P-Shot, the non-surgical treatment uses the platelet-rich plasma extracted from your own blood, which contains rich growth factors, and then carefully introduces it into specific areas on the penile tissue.

As natural healing occurs, it stimulates growth of healthy surrounding tissue with long-lasting results and minimal downtime.

Now that penile augmentation can be carried out non-surgically, Cosmetic Image Clinics is proud to be the first clinic in Brisbane to offer this simple solution for men concerned with their size and performance.

Cosmetic Image Clinics offers complimentary consultations for those searching for further information or to find out if this is the right treatment option for them. Contact the clinic today to find out more information.
