## SKIN BEAUTY BOOSTER

SIGNS OF AGEING and sun damage, along with other lifestyle choices, can contribute to unhealthy-looking skin.

So what can you do to help hydrate and repair your skin besides using a moisturiser? Skin Beauty Booster is a new treatment to hydrate and moisturise the skin. This hydration and therapeutic needling treatment uses the Vital Injector 2 (V2 Injector) and needling to nourish and help repair the skin.

Fibroblasts are triggered, encouraging new collagen and elastin in the skin. The goal is to treat the skin, not to fill lines or increase volume like anti-wrinkle muscle relaxants or dermal fillers. By coupling a needling treatment with small deposits of an injectable substance, you have the advantage of two treatments in one.

This injectable compensates for the natural loss of hyaluronic acid in the skin and can also assist in stimulating the production of collagen.

This treatment replenishes your skin to help it glow, smooth out wrinkles and restore volume.
